Sustainability is at the forefront of our thoughts at NIC ICE Ltd. We are focused on taking our share of responsibility and contributing to help solve the global health and sustainability challenges.

Plastic pollution has become a global phenomenon; even in the most remote locations. Plastic is not biodegradable. It only breaks down into smaller particles. The repercussions of this have been highlighted in recent years and taken on board by many big brands.

While at the moment it is not always possible in our market to provide a biodegradable or compostable alternative to plastic we are working hard in our Development team to do just that. Please contact your Area Manager for information on our expanding range of environmentally friendly products.
